EXPERIENCE

Internship

June 2025 – July 2025

Software Development Intern at Pursue Today

Lahore, Pakistan

- Developed a full-stack portfolio platform with theme switching, modular components, and dynamic blog rendering
- Built an AI chatbot using LangChain + web-scraped knowledge base for intelligent query handling
- Implemented vector-based retrieval workflows to enhance response relevance
- Designed and deployed a meeting scheduling system to streamline team operations
- Applied prompt engineering and structured document processing for improved LLM performance

PROJECTS

EmpowHR | *Next.js, Tailwind, Python, n8n, MongoDB*

- Developed an AI-driven HR automation platform for resume parsing, automated interview scheduling, and workflow management.
- Built the interview module with two components: automated interview conduction and candidate analysis using similarity indexing, facial expression recognition, and speech analysis for performance evaluation.

Eye Gaze & Engagement Analysis | *Python, OpenCV, TensorFlow, Deep Learning*

- Developed an eye contact and engagement detection system by training a simple CNN and EfficientNet on the Columbia Gaze Dataset.
- Classified user engagement levels (attentive, distracted, disengaged) based on gaze angle and head pose, optimizing the model for efficient real-time webcam inference.

Spell Checker | *Flask, NLTK, HTML, CSS, JavaScript*

- Built an NLP-powered grammar and spell checking system with real-time linguistic analysis and error detection.
- Implemented contextual synonym suggestions for descriptive words, enhancing vocabulary and sentence quality.

Hospital Management System | *React, Node.js, SQL*

- Developed a full-stack hospital management system with role-based login (Admin, Doctor,patient), supporting patient management, doctor/staff profiles, appointment scheduling,with responsive dashboards.
- Built secure REST APIs, integrated relational database for data integrity and role-based access control for efficient hospital operations.

Tetris | *C++*

- Implementing core programming concepts such as loops, arrays, collision detection, and game logic.
- Handled real-time piece movement, rotation, line clearing, and scoring, demonstrating understanding of algorithmic thinking.

EDUCATION

National University of Computer and Emerging Sciences

Aug. 2022 – Present

Bachelor in Computer Science

Lahore

- **Coursework:** OOP, Data Structures, Algorithms, Databases, Operating System, Artificial Intelligence, Data Science, Software Testing

SKILLS

Languages : Python, JavaScript (React.js / Next.js), HTML, CSS, SQL, Tailwind CSS, Node.js, Flask

Tools : n8n, Google Services, Git, GitHub, Vercel, Figma, REST APIs
